PEER SUPPORT

Part of the role of a Peer Support Specialist is supporting people to not feel alone in their experience.

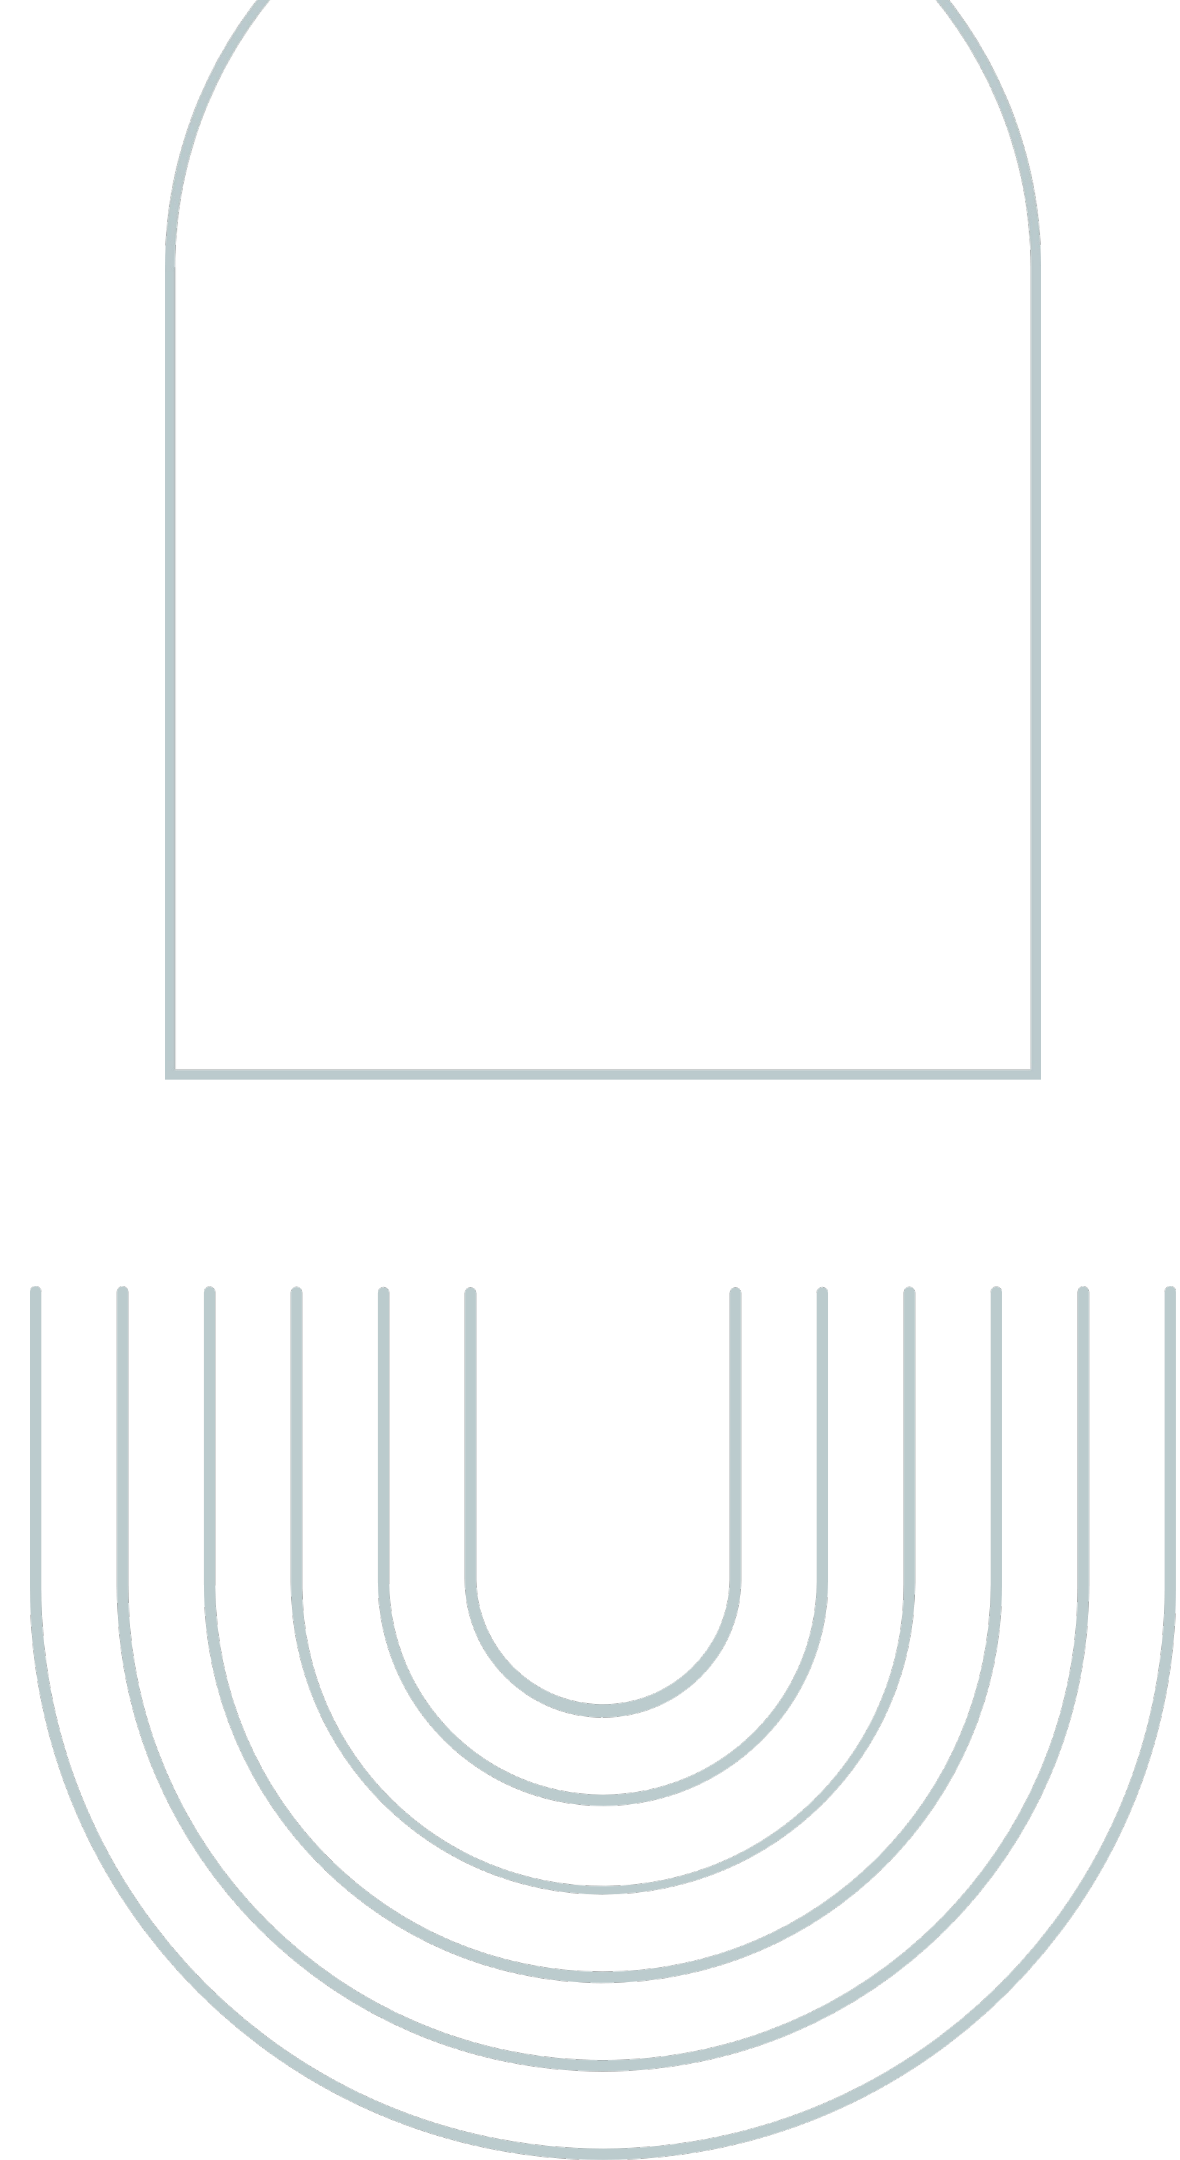

Yet, Peer supports are often put in a position to feel alone in their role.

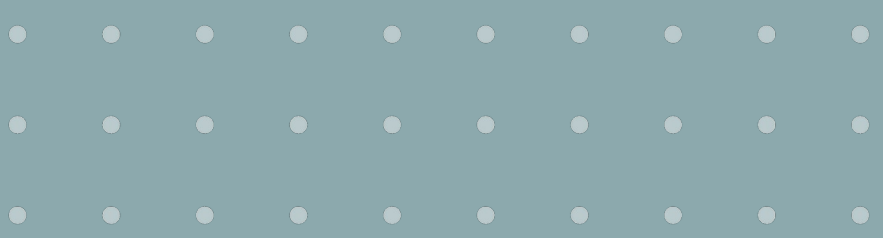

ROLE CHANGE

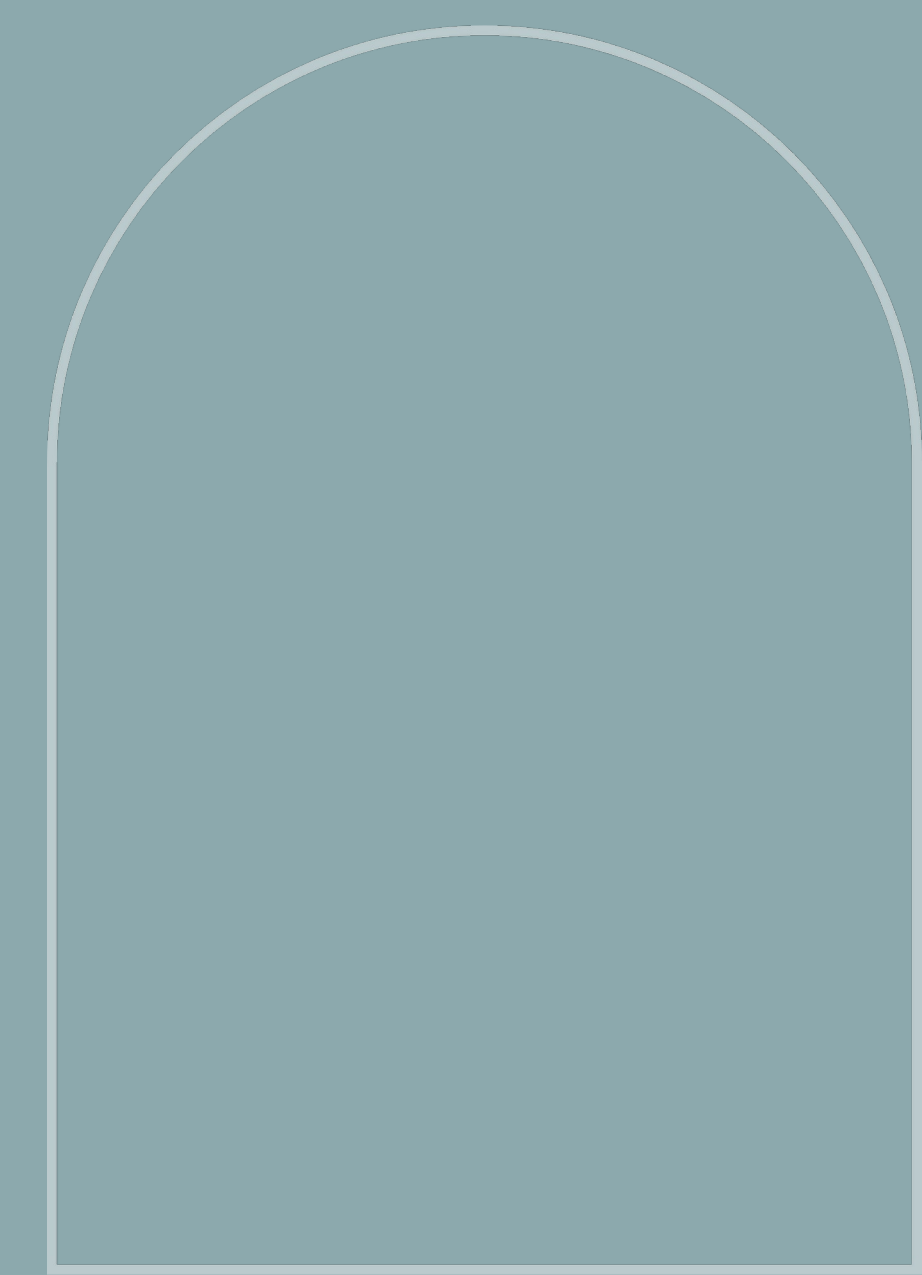

Peer Support

- Navigate the dichotomy of switching roles from participant to peer support.
- Unexpected pressures
- feeling fulfilled

**HOW DID IT FEEL WHEN I ASKED
YOU ALL TO SHARE THE MOST
TRAUMATIC EXPERIENCE OF
YOUR LIFE?**

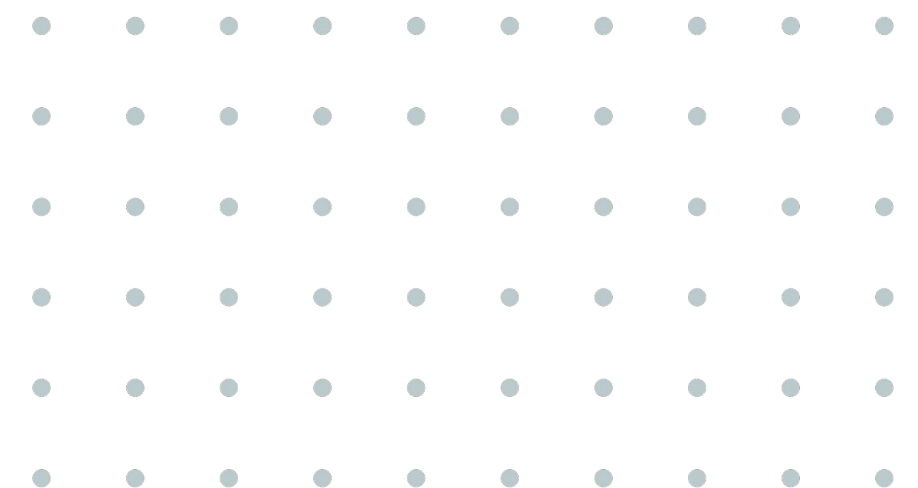

Peer Support Continued

Voice of hope

Agent of change

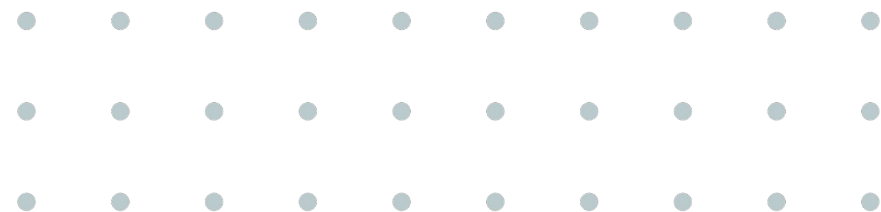

Unconscious bias

ROLE CHANGE

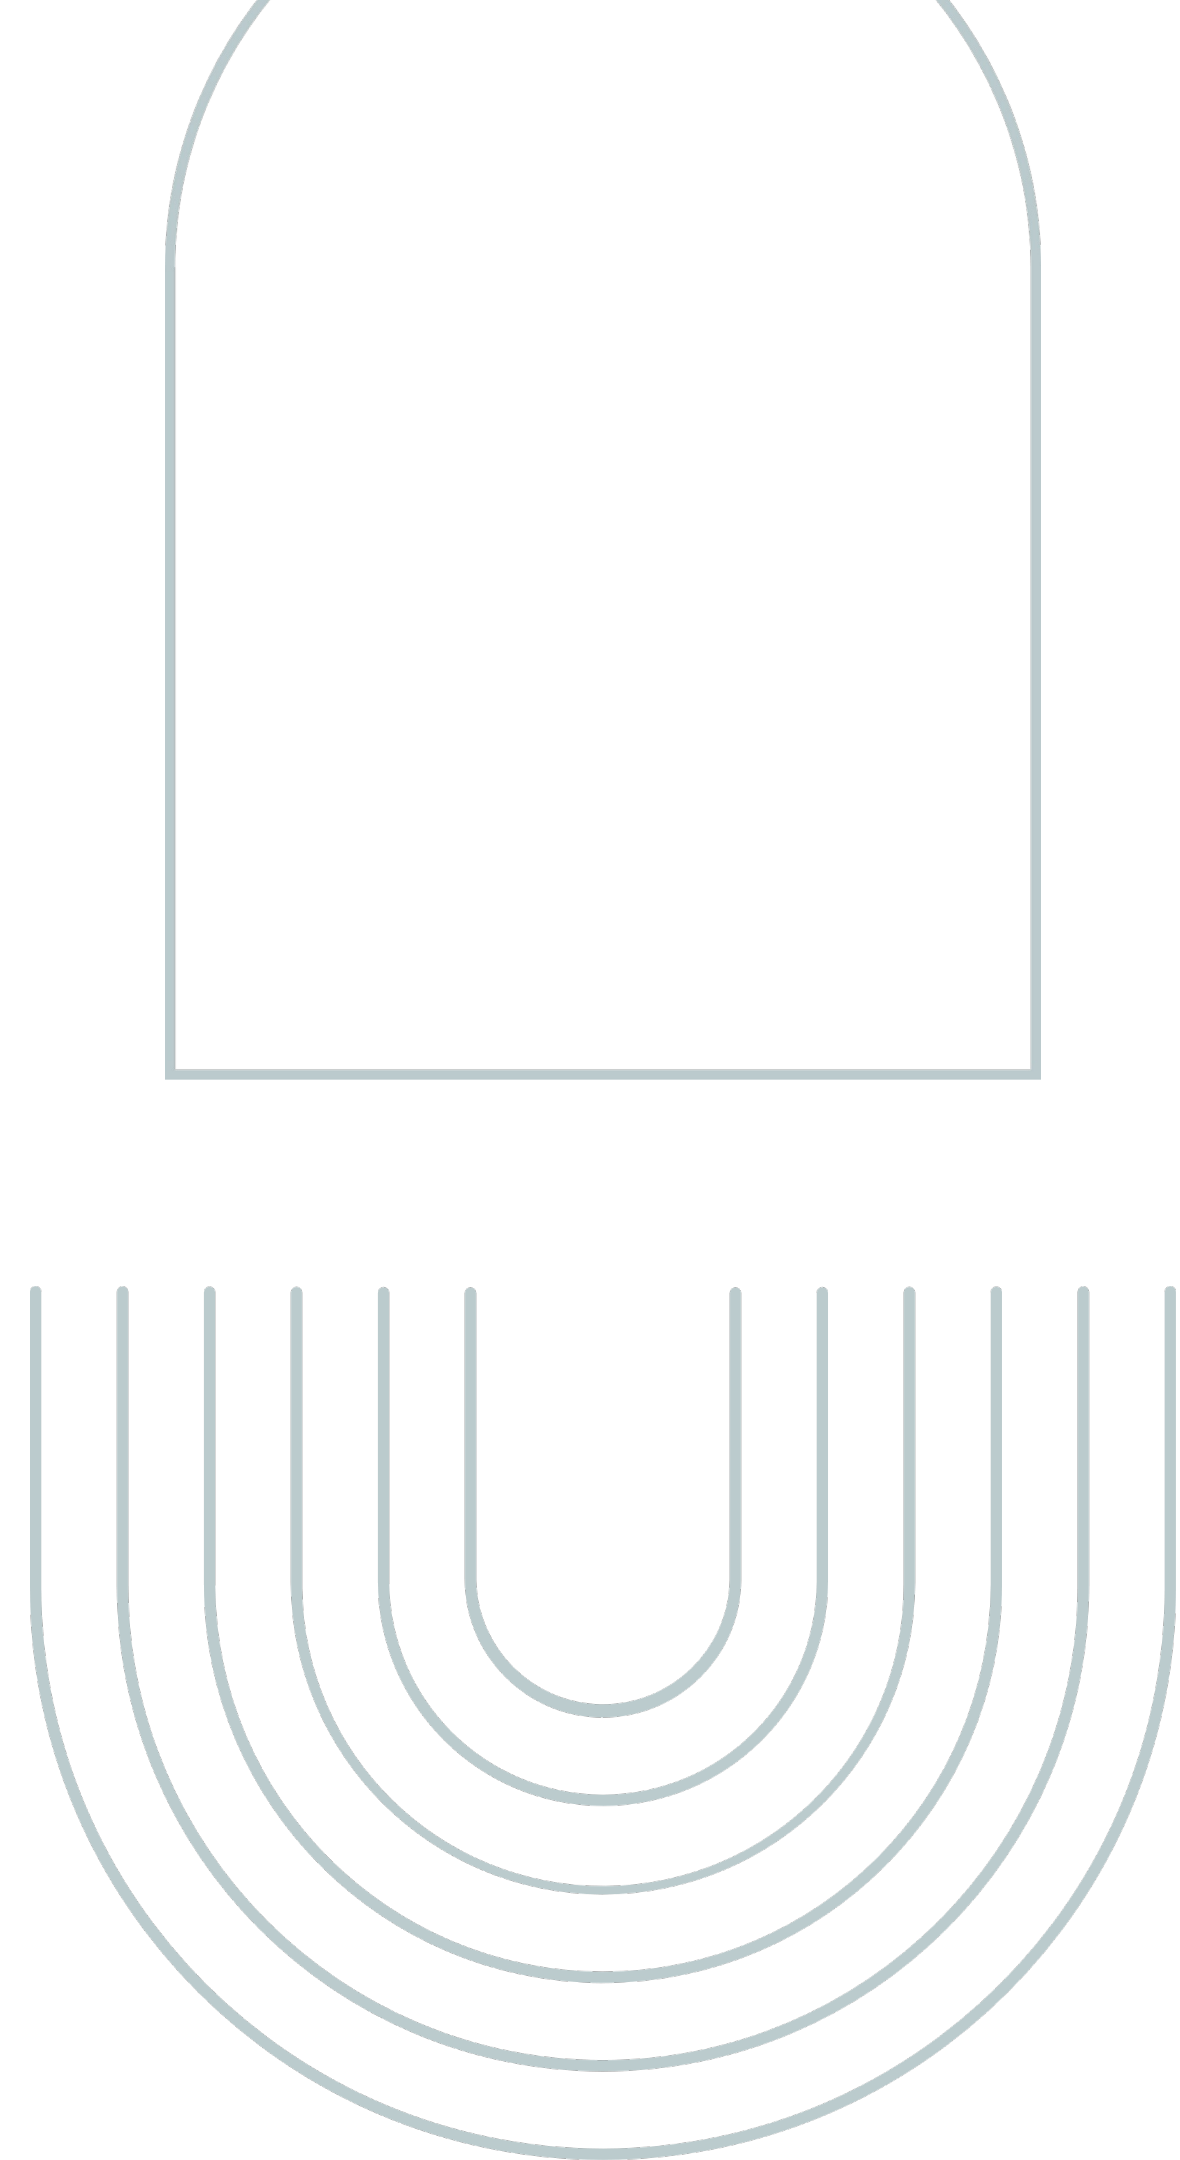

Peer Support Supervisor

- Learning and understanding supervisory duties.
- Setting up new peer supports for success.

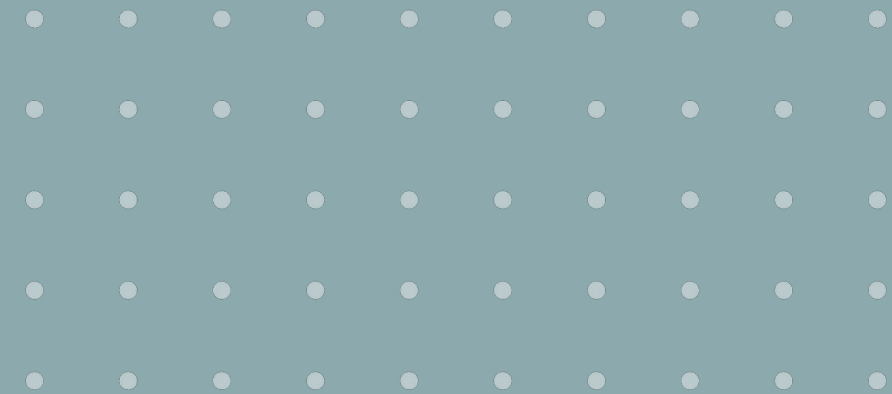

SEE Specialist

- To disclose or not to disclose?
- Seen as a professional
- Providing a service previously helpful to me.

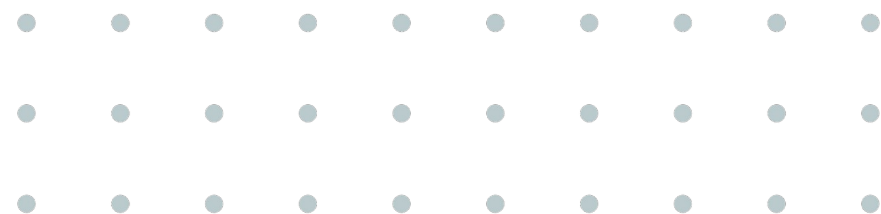

**IN WHAT WAYS HAVE YOU WITNESSED
OR PARTICIPATED IN BIAS AGAINST
PEER SUPPORTS?**

MSW Student

- A new understanding
- Realizing MSW students come into the workforce equipped with information
Peer Support Specialists/Bachelor level workers learn along the way.

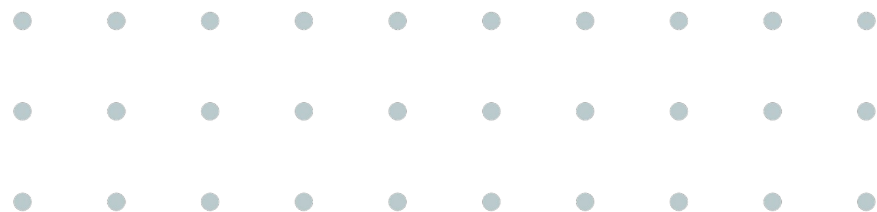

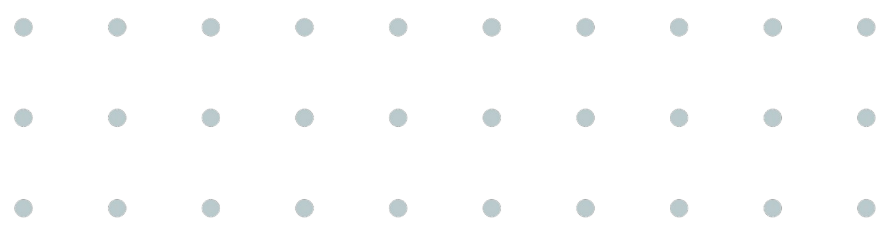

The following is not considered within the scope of practice for MSW First Year (Foundation) students:

- Risk Assessment
- Mental Status Exams
- Suicidal Ideation
- Homicidal Ideation

- Delusions/hallucinations

- Mental Health Evaluations
- Therapy (or counseling equivalency)
- Diagnosis
- Students should not dispense any type of medication, or physically restrain clients

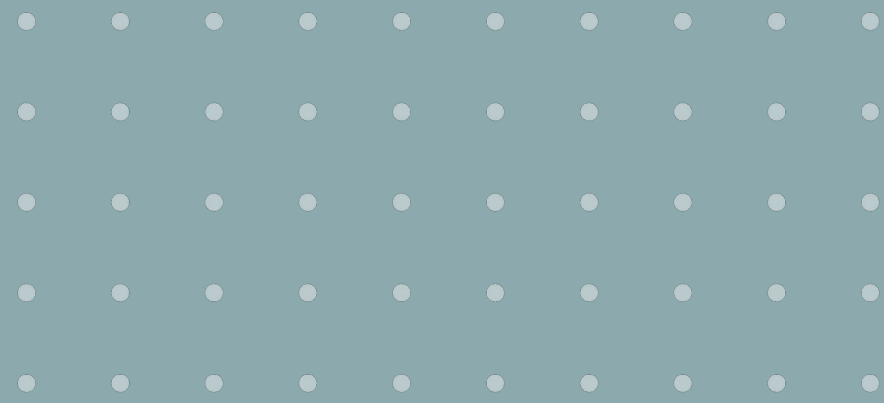

“We are a conspiracy of hope and we are pressing back against the strong tide of oppression which for centuries has been the legacy of those of us who are labelled with mental illness. We are refusing to reduce human beings to illnesses.”

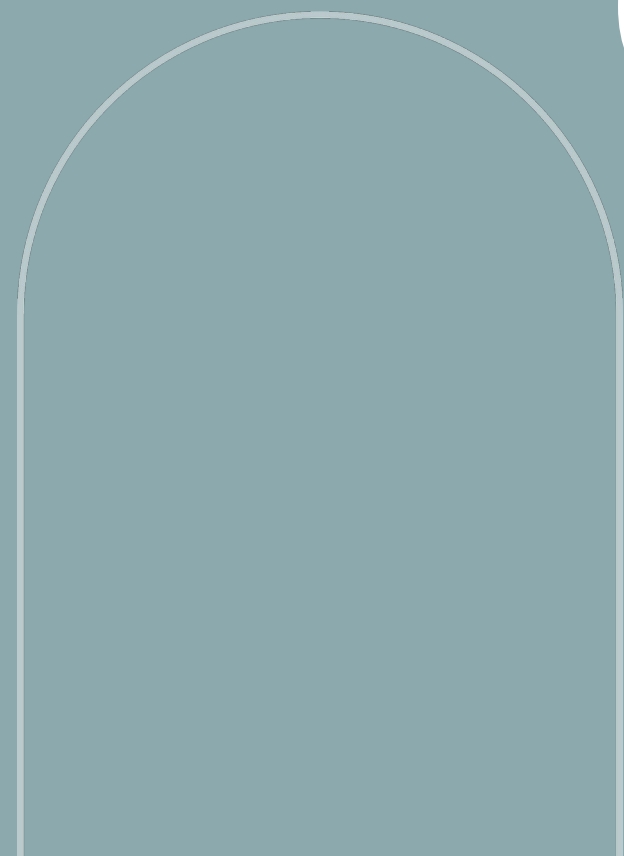

-Pat Deegan

THANK YOU!
